📍 Odesa, Ukraine. Now - Bucharest, Romania

PROFILE

I'm a motivated seaman who is trying to switch to frontend developer. Passionate about creating user-friendly web applications. My previous job gave me a lot of soft skills such as being a team player, critical thinking, problem resolving, self-learning, time management, and many others needed to communicate in a team. I'm good at self-learning and looking for the opportunity to start my developer career. Now I'm developing a project for controlling the budget and learning new technologies.

SKILLS

HTML, CSS, Javascript

React, TypeScript, Storybook

TailwindCss, RadixUi, Styled Component

Supabase, React Query

RestApi

Git

WORK EXPERIENCE

E-Budget (Pet Project)

React, Typescript, Supabase

Aug 2023 - now

- Developing web application for tracking budget. Tech stack: React, Typescript, React Dom Router, Styled Components, React Hook Form, Tanstack Query, Supabase.
- Main goals to keep all expenses & incomes in one place. To analyze expenses to incomes and rate of expenses.
- **Now implemented:** user login/signup. User can create/delete expense/incomes. Dashboard with detail statistic. Pages of expenses/incomes and all transaction. Filtering & sorting transactions.
- **Future features:** User can share his budget with his family. Create custom categories of transactions. Notification about regular expenses such as flat rent, credit pay etc. Currency change. Search transaction. Feedbacks from users. Night/day theme. Monetization by subscription with will implement different features in different subscriptions.

DrawIt

Mobile application. Unity, C#, Vuforia.

Feb - May 2017

- Our team had the opportunity to participate in our project DrawIt with augmented reality in the Imagine Cup 2017 competition.
- This application helps children to start drawing with simple shapes. After it successfully drew you can see a beautiful 3D model in AR. Youtube.
